IEEE Spectrum

Tech Insiders
webinar series

[IEEE Spectrum's Tech Insider Webinar Series](#)

Stay current and learn from leading industry experts as they explore important technology developments and trends. Interact with presenters through a live Q&A following each live webinar.

Below are some of our upcoming and recent on-demand webinars. Click on an individual webinar for more details or [CLICK HERE](#) to get all available webinars.

(IEEE members can also earn CEUs by registering and attending the Spectrum webinars)

[Available Now! Calibre DRC Automated Waiver Technology](#)

The Auto-Waiver technology significantly reduces the complexity of waiving false errors without the issues and limitations of historic approaches. In this webinar, the Auto-Waiver approach for Calibre DRC is presented.

Presenter:

John Ferguson, Mentor Graphics

[Live on Aug 18th: Batteries and Fuel Cells Simulation](#)

New simulation technology accelerates the design of electrochemical systems. This webinar introduces you to best practices for modeling batteries & fuel cells.

Presenters:

Dr. Ed Fontes, Comsol. Inc.

Dr. Dawn Bernardi, Ford Motor Company

[Live on Aug 19th: Standards Driven Application Development for Energy & Utilities Industry](#)

Using the prevailing best practices, this session presents a formal, model and requirements based development for the emerging Smart Grid industry.

Presenter:

Irv Badr, Go-to-Market Manager: Energy & Utilities, IBM Rational

[Live on Sep 21st: Introducing Ansoft Designer 6.0](#)

This presentation introduces the latest enhancements in Ansoft Designer, the integrated design manager combining electromagnetic field solvers with circuit simulation tools. It will include examples that highlight new features and automation enhancements designed to save design & simulation time.

Presenter:

Eldon Staggs, Product Manager for Ansoft Designer and Nexxim

[Live on Sep 24th: Hall Effect Measurements for Semiconductors and Other Materials Characterization](#)

This webinar will discuss Hall Effect measurements as they relate to semiconductor materials and device characterization. Also, industry trends and key considerations when selecting equipment.

Presenter: Robert Green, Instruments Senior Market Development Manager, Keithley

[Live on Sep 30th: The Top Three Prototyping Challenges in Robotics](#)

Learn how the latest design tools can help you meet challenges like integrating with sensors & actuators, implementing autonomy, & deploying deterministic control algorithms to embedded hardware.

Presenter:

Meghan Kerry, Product Marketing Manager for Robotics, NI

Todd Dobberstein, Group manager of embedded hardware, NI

[Available Now! Top 10 Clean Energy Business Opportunities](#)

Learn about 10 clean energy business opportunities that address important industry needs in the smart grid, wind, solar, biomass, and energy storage markets. Gain useful tips for creating a prototype and an introduction to specific starter kits, reference designs, etc.

Presenter:

Brian MacCleery, Senior Product Manager, Energy Efficiency & Renewable Energy

Todd Dobberstein, Group Manager of Embedded Hardware

To ensure delivery, please add techalert@ieee.org to your e-mail address book or Safe Sender List. If you are still having problems receiving our communications, [see our white-listing page for more details](#).
